### **Artist Statement**

Mithu Sen lives and works in New Delhi, well known for her mixed-media works that play on sexuality, gender, and societal roles, often fusing human faces and figures with other living organisms including animals and plants.

Born in Bengal and educated at Santiniketan and the Glasgow School of Art, Mithu Sen has consistently exhibited a diverse field of mediums which have included drawing, sculpture, collage, sound and installation to contextualise critical understanding in a witty and innovative manner. Using poetical influences she often suggests and is suggestive of playing fields and grounds of her understanding of a complex world of subjects and subjectivities.
